SPACHE – 2nd TRANSNATIONAL MEETING (Gargnano, Italy)

SPACHE Project – Second meeting took place in Italy

Cultural heritage to promote physical activity and sport

The second transnational meeting of the SPACHE project - Sport and Physical Activity in Cultural Heritage Environments, was held on 14, 15 and 16 September in Gargnano (Italy), led by Tempo Livre through the Center for Sports Studies, in which representatives of the Municipality of Guimarães also participated.

The meeting organized in a mix format (in person and online) was coordinated by Tempo Livre and had the presence of all the consortium partners in representation of six countries from European Union (Portugal, Germany, Slovenia, France, Italy, and Netherlands).

During these three days, the guidelines for the pilot projects to be carried out in 2022 were discussed, highlighting the fact that they are aimed at a target audience that is usually inactive and intends to motivate and involve in the practice of physical activity and sport, in contexts related to local heritage and culture.

The pilot projects will be implemented in 2022 in four countries (Portugal, Slovenia, Italy, and Netherlands) and aim to put into place the action plan to be drawn up in the coming months.

This international meeting, organized by the Italian partner, Alta Garda Volley Association, was also an opportunity to discover the cultural heritage of the region, in a territory framed by the high mountains and by *Lago di Garda*.
